Chișinău, 2022

Ex1

Present the language $L(G)$ generated by the given grammar $G = (V_n, V_t, S, P)$

- $V_n = \{S\}; V_t = \{a\}; P = \{S \rightarrow aS, S \rightarrow \varepsilon\}$

$$L = \{a^n | n \geq 0\} \quad (1)$$

- $V_n = \{S\}; V_t = \{a\}; P = \{S \rightarrow aS, S \rightarrow a\}$

$$L = \{a^n | n \geq 1\} \quad (2)$$

- $V_n = \{A\}; V_t = \{0,1\}; P = \{A \rightarrow 0A1, A \rightarrow 01\}$

$$L = \{0^n, 1^n | n \geq 1\} \quad (3)$$

Ex2

Identify the grammar for the following languages:

- $L = \{a^n, b^n | n \geq 0\}$

$$V_n = \{S\}; V_t = \{a, b\}; P = \{S \rightarrow \varepsilon, S \rightarrow aSb\} \quad (4)$$

- $L = \{a^n, b^n | n > 0\}$

$$V_n = \{S\}; V_t = \{a, b\}; P = \{S \rightarrow aSb, S \rightarrow ab\} \quad (5)$$

- $L = \{a^n, b^{n+1} | n \geq 1\}$

$$V_n = \{S\}; V_t = \{a, b\}; P = \{S \rightarrow aSb, S \rightarrow abb\} \quad (6)$$

- $L = \{a^n, b^n, c^m, d^m | n > 1, m > 1\}$

$$V_n = \{S, A\}; V_t = \{a, b, c, d\}; P = \{S \rightarrow aSb | aAb; A \rightarrow dAc | dc\} \quad (7)$$

- $L = \{a^n, b^n, c^m, d^m | n \geq 0, m \geq 0\}$

$$V_n = \{S, A\}; V_t = \{a, b, c, d\}; P = \{S \rightarrow aSb | aAb | \varepsilon; A \rightarrow dAc | dc | \varepsilon\} \quad (8)$$

- $L = \{a^n, b^m, c^m, d^n | n > 1, m > 1\}$

$$V_n = \{S, A\}; V_t = \{a, b, c, d\}; P = \{S \rightarrow aSd | aAd; A \rightarrow bAc | bc\} \quad (9)$$

- $L = \{a^m, b^n, c^{m+n} | n \geq 1, m \geq 1\}$

$$V_n = \{S, A, B\}; V_t = \{a, b, c\}; P = \{S \rightarrow AB; A \rightarrow aAc | ac; B \rightarrow bBc | bc\} \quad (10)$$

- $L = \{a^m, b^{m+n}, c^n | n \geq 1, m \geq 1\}$

$$V_n = \{S, A, B\}; V_t = \{a, b, c\}; P = \{S \rightarrow AB; A \rightarrow aAb | ab; B \rightarrow bBc | bc\} \quad (11)$$

Ex3

For the given grammar identify the generated word:

$G=(V_n, V_t, S, P)$ $V_n = \{ \langle \text{programm} \rangle, \langle \text{set of affirmation} \rangle, \langle \text{afirmation} \rangle, \langle \text{assigment} \rangle, \langle \text{test} \rangle, \langle \text{variable} \rangle, \langle \text{number} \rangle, \langle \text{alpha} \rangle \}$;

$V_t = \{ \text{begin, end, succ, pred, while, do, :=, } \neq, ;, (,), 0, 1, \dots, 9, A, B, \dots, Z \}$

$P = \{ \langle \text{program} \rangle \rightarrow \text{begin end}$
 $\langle \text{program} \rangle \rightarrow \text{begin } \langle \text{set of affirmation} \rangle \text{end}$
 $\langle \text{set of affirmation} \rangle \rightarrow \langle \text{afirmation} \rangle$
 $\langle \text{set of affirmation} \rangle \rightarrow \langle \text{set of affirmation} \rangle \langle \text{afirmation} \rangle$
 $\langle \text{afirmation} \rangle \rightarrow \langle \text{assigment} \rangle$
 $\langle \text{afirmation} \rangle \rightarrow \text{while} \langle \text{test} \rangle \text{do} \langle \text{afirmation} \rangle \text{— } \langle \text{program} \rangle$
 $\langle \text{afirmation} \rangle \rightarrow \langle \text{program} \rangle$
 $\langle \text{test} \rangle \rightarrow \langle \text{variable} \rangle \neq \langle \text{variable} \rangle$
 $\langle \text{assigment} \rangle \rightarrow \langle \text{variable} \rangle := 0$
 $\langle \text{assigment} \rangle \rightarrow \langle \text{variable} \rangle := \text{succ}(\langle \text{variable} \rangle)$
 $\langle \text{assigment} \rangle \rightarrow \langle \text{variable} \rangle := \text{pred}(\langle \text{variable} \rangle)$
 $\langle \text{variable} \rangle \rightarrow \langle \text{alpha} \rangle$
 $\langle \text{variable} \rangle \rightarrow \langle \text{variable} \rangle \langle \text{alpha} \rangle$
 $\langle \text{variable} \rangle \rightarrow \langle \text{variable} \rangle \langle \text{number} \rangle$
 $\langle \text{number} \rangle \rightarrow 0 \text{—} 1 \text{—} 2 \text{—} 3 \text{—} 4 \text{—} 5 \text{—} 6 \text{—} 7 \text{—} 8 \text{—} 9$
 $\langle \text{alpha} \rangle \rightarrow A \text{—} B \text{—} \dots \text{—} Z \}$

Solution

$\langle \text{program} \rangle \rightarrow \text{begin } \langle \text{set of affirmation} \rangle \text{ end} \rightarrow \text{begin } \langle \text{afirmation} \rangle \text{ end} \rightarrow$
 $\text{begin } \langle \text{assigment} \rangle \text{ end} \rightarrow \text{begin } \langle \text{variable} \rangle := 0 \text{ end} \rightarrow \text{begin } \langle \text{alpha} \rangle := 0$
 $\text{end} \rightarrow \text{begin } A := 0 \text{ end}$

```
begin
  A:=0
end
```

Ex4

Define grammar tha generates the variable identifiers from Java.

$$\begin{aligned}V_n &= \{ \langle \text{start} \rangle, \langle \text{next} \rangle \} \\V_t &= \{ 0, 1, 2, \dots, 9, A, B, C, \dots, Z, a, b, c, \dots, z, \$, _ \} \\P &= \{ \langle \text{start} \rangle \rightarrow A|B|\dots|Z|a|b|\dots|z\langle \text{next} \rangle, \\&\quad \langle \text{next} \rangle \rightarrow A|B|\dots|Z|a|b|\dots|z|0|1|\dots|9|\$|\dots\langle \text{next} \rangle, \\&\quad \langle \text{next} \rangle \rightarrow \varepsilon \}\end{aligned}$$

Ex5

Define the grammar that generates all real literals in Java.

$$\begin{aligned}V_n &= \{ \langle \text{float} \rangle, \langle \text{decimal} \rangle \} \\V_t &= \{ 0, 1, 2, \dots, 9, A, B, C, \dots, Z, a, b, c, \dots, z, . \} \\P &= \{ \langle \text{float} \rangle \rightarrow A|B|\dots|Z|a|b|\dots|z\langle \text{decimal} \rangle, \\&\quad \langle \text{decimal} \rangle \rightarrow .|A|B|\dots|Z|a|b|\dots|z|0|1|\dots|9|\$|\dots\langle \text{decimal} \rangle, \\&\quad \langle \text{decimal} \rangle \rightarrow \varepsilon \}\end{aligned}$$

Ex6

Define the grammar that generates the strings that correspond to valid currency amounts. A valid string is either a dollar sign followed by a number which has no leading 0's, and may have a decimal point in which case it must be followed by exactly two decimal digits, OR a one or two-digit amount followed by the cent sign c. The single exception to this rule is that strings which begin with "\$0." and are followed by exactly two digits are also acceptable. Thus, \$432.63, 1,0.29, 47c, 2c are all accepted, but \$021, \$4.3, \$8.63c, \$0.0 are not accepted.

Solution

$$\begin{aligned}V_n &= \{ S, A \} \\V_t &= \{ 0, 1, 2, \dots, 9, \dots, \$, c \} \\P &= \{ \\&\quad S \rightarrow \$1|2|\dots|9A, \\&\quad S \rightarrow Dc, \\&\quad S \rightarrow DDc, \\&\quad S \rightarrow \$0.DD, \\&\quad A \rightarrow 0|1|\dots|9A, \\&\quad A \rightarrow .DD, \\&\quad D \rightarrow 0|1|\dots|9 \}\end{aligned}$$
